100 BARRELS OF FLOUR.

Two Little Pairs of Boots.

Two little pairs of boots, to-night, Before the fire are drying: Two little pairs of tired feet In a trundle bed are lying: The tracks they left upon the floor Make me feel like sighing!

Those little boots with copper toes! They run the live-long day; And oftentimes I almost wish That they were miles away, So tired am I to hear so oft Their heavy tramp at play.

They walk about the new-plowed ground Where mud in plenty lies: They roll it up in marbles round; They bake it into pies:

And then at night upon the floor In every shape it dries! To-day I was disposed to scold; But when I look, to-night, At those little boots before the fire.

With copper toes so bright, I think how sad my heart would be To put them out of sight: For in a trunk up stairs I've laid Two socks of white and blue: If called to put those boots away, Oh God! what should I do?

I mourn that there are not, to-night, Three pairs instead of two. I mourn because I thought how nice My neighbor cross the way

Could keep her carpets all the year From getting worn or gray; Yet well I know she'd smile to own Some little boots to-day! We mothers weary get and worn

Under our load of care; Yet how we view our little ones Let each of us beware; What would our firesides be to-night. Were little boots not there?

MENT OF COAL.

The Great Exhibition.

TON JOURNAL.

Paris, April 1, 1867. and empress of France. It was intended different nations eat. casion should be one of the grandest pageants of modern times, and invitations were sent to every European court to be present. Favorable replies were received from many royal personages. The Prince of Wales was expected, also the king of Portugal, the king of Holland, the sons of Victor Emanuel. Rooms in some of the hotels were engaged for the royal guests: but a few days ago the imperial guests that the pageant would not take

This was not necessary from the fact that it was found impossible to have the exhibition in decent order by to-day. The work has been delayed some by bad weather, but the failure is mainly due to the want of capacity in the imperial commission. The head of the commission, I am informed, is not the man for The Reading Railroad Coal Depot He has insisted on the carrying out of
